

PRODUCT: Trichlorisocyanuric Acid
 Bicolour 5+1 200g / 250g Tablets

EDITION: February 2008
REVISION: 3 – February 2015

SPECIFICACIONES

CHARACTERISTICS	VALUE	UNITS	METHOD*
Available chlorine quick layer	50,0 min.	% p/p	DS01PF02.7100
Available chlorine slow layer	80,0 min.	% p/p	DS01PF02.7100

^(*) The Company's internal procedures are based partly or fully on analytical reference methods (ISO, ASTM).

TYPICAL VALUE

Aspect	Round flat tablets consisting of two layers with different colour and different composition
pH (1 % solution)	2,7 – 3,3

OTHERS

Applications :

Direct treatment for the disinfection of swimming pool water. Quick dissolution layer for chock chlorination and slow dissolution layer for maintenance chlorination. Act as a disinfectant, algicide, flocculant and anti-chalker.

Treatment :

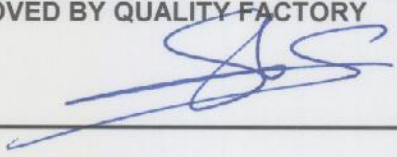

With the pH of the water adjusted between 7,2 - 7,6, place the tablets in the skimmers or feeders. **NOT TO USE IN CHLORINATORS NEITHER WITH DIATOMS FILTERS.**
SHOCK AND MAINTENANCE CHLORINATION WEEKLY: 4-6 tablets for each 100 m³ of water a week. The effervescent action of the quick layer provides the necessary dose of chlorine immediately to the pool.
 These doses are approximates. The residual chlorine will be located ideally between 0,8 - 1,2 mg/l (or in the values that it marks the normative one applicable), value that will be measured easily using an analyzing kit for Chlorine and pH. This control should be made daily as minimum.

For further information, please refer to the material safety data sheet.
